many unsuccessful races for office.
This one will be just as unsuccessful
as the others.

Deafness Cannot be Cured
by local applications, as they cannot
reach the diseased portion of the ear.
There is only one way to cure deaf-
ness, and that is by constitutional
remedies. Deafness is caused by an
inflamed condition of the mucous
lining of the Eustachian Tube. When
this tube is inflamed you have a
rumbling sound or imperfect hear-
ing, and when it is entirely closed,
deafness is the result, and unless the
inflammation can be taken out and
this tube restored to its normal con-
dition, hearing will be destroyed for-
ever; nine cases out of ten are caused
by catarrh, which is nothing but an
inflamed condition of the mucous
surfaces.

We will give one hundred dollars
for any case of deafness (caused by
catarrh) that cannot be cured by

Why Age Improves Wines.
"Why do wines improve with age?"
"Because they marry," answered
the expert.
"Marry?"
"Yes; that is the term used in the
trade," said a dealer to a New York
press writer.
"This sherry," we say, "has mar-
ried well," or "that '96 hock has mar-
ried nastily." We mean by a wine
marriage that its different compo-
nents—the alcohol, the sugar, the car-
bonic acid, and so on—have blended
together smoothly. In a new wine
this blending, this marriage, has not
yet taken place, and hence the
harshness of new wines. Old wines
are delicious because the alcohol and
sugar and acids and ethers have all
married into one fragrant compound.

Scrofula

Few are entirely free from it.
It may develop so slowly as to cause
little if any disturbance during the whole
period of childhood.
It may then produce dyspepsia, cat-

sumption, and causing eruptions,
sores or swellings.
To get entirely rid of it take the great

The Singer Building, now nearing
completion in New York, is the tallest
building in the world, it towers 612
feet above Broadway. Some idea of
what this means may be gained from
the fact that the Washington Monu-
ment is only 555 feet high. Other
structures which are over-topped are
St. Peter's Rome 400 feet; Philadel-
phia Hall, 537 feet; Pyramid, Egypt,
485 feet; Park Row Building, New
York, 382 feet. The Singer Building
is 47 stories high and has a floor
area of 9.44 acres, or 411,333 square
feet, on a ground area of only 24,000
square feet, the foundation of the
structure rests on bedrock ninety
feet below Broadway.

Cost of Books Centuries Ago.
With many of the classics to be had
for sixpence, it is difficult to realize
that less than five hundred years ago
they were a luxury at the command
of only the most favored. A countess
of Anjou, in the fifteenth century,
paid for one book 200 sheep, five
quarters of wheat and the same
quantity of rye and millet; and in the
early times the loan of a book was
considered to be an affair of such im-
portance that, in 1299, the Bishop of
Winchester, on borrowing a Bible
from the convent in that city, was
obliged to give bond for its restora-
tion, drawn up in the most solemn
manner; and Louis XI. (in 1471) was
compelled to deposit a large quantity
of plate, and to get some of his
nobles to join with him in a bond
before they could procure the loan of
one.

GERONIMO IMPLACABLE

**Great Ped Prisoner, Nearly
A Century Old, Says He
Will Yet Escape.**

Geronimo has always been a "bad
Injun." His tribe has been con-
spicuous for fierce bravery, and the
paleface soldiers have never tamed
them. They stubbornly disputed
every foot of the Southwest. They
sometimes surrender, when matched
against tremendous odds, but they
were never subdued. The old chief
is an embodiment of the tribal
spirit.

Geronimo and his followers have
been prisoners since their last great
campaign in 1886. The fights they
put up on that occasion would have
won undying glory for any band of
white soldiers. Geronimo and his
warriors had risen in rebellion and
drawn the attention of the United
States army. General Miles and
Captain Henry W. Lawton started
out to round them up. Geronimo
led Lawton's troops a terrible chase
through plains and deserts, across
rivers, over mountains 12,000 feet
high, where the hot sun blistered
the hand that touched a rifle barrel,
and at last, after many months, a
pursuit extending over 3,000 miles
and the expenditure of millions of
dollars, he was captured by a force
of 2,000 picked soldiers. The army
with which he defied all the power
of the United States was found to
consist of twenty-two men, fourteen
squaws and three children. This
achievement is probably unmatched
in history except by the last stand
of a few brave Australian bushmen
against several thousand British
troops.

The native's point of view is recog-
nized more clearly, now that he has
been killed off and subdued and im-
prisoned and educated and taught to
wear store clothes that he doesn't
want, and has acquired the white
man's bad habits. The red men
made a brave fight for their coun-
try. They were the originally pat-

Effective Color Scheme.
Pale moutarde yellow and mauve
make a charming color scheme if the
right tones are used, and the same is
true of yellow and willow green and
yellow and natter blue. A model ob-
served along the Place Vendome, says
a Paris correspondent, is gracefully
carried out in pale yellow mousseline
bordered by wide black stripes and a
crossed fichu of white mousseline is
folded inside of the draped bodice. A
knot of soft mauve satin is at the bust
line, and the girdle is of the striped
mousseline plaited lengthwise so that
only the black stripes show.
The sleeve is in one with the bodice,
the armhole reaching to the girdle
top and finished in bands of embroi-
dery and lace. The undersleeves are of
chiffon to match the fichu.

Dress Decorations.
Imagine a delicate pink ground
shading to a pink just a shade deeper
behind the graceful sprays of apple
blossoms which are scattered over the
surface, their pink petals melting into
the pink background and their faintly
green leaves giving just the needed
touch of relieving color in the har-
mony of pink and white. A blue and
white spider cloth has a wide stripe
of shaded blue, light even in its deep-
est tone, alternating with a wide stripe
of white, and over all are thrown clus-
ters of little white daisies. It is in
the exquisite drawing of the floral de-
signs and in the way in which they ap-
pear to melt into the background of
standing out clear-cut and distinct
that half the effectiveness of these
new silk and cotton materials lies.

Limit in Time Saving.
A New York dentist tells how one of
his patients—a business man—saves
time. "He came in the other morn-
ing for his 9 o'clock appointment, fol-
lowed by a ragged looking urchin. I
didn't understand and started to shut
the door in the boy's face. 'No, no,
doctor, let him in,' said my patient.
'I'm in a terrific hurry, so I brought
along the corner bootblack. I thought
you wouldn't mind his giving me a
shine while you attended to my
tooth.'

Downtrodden Husbands.
The middle class woman in England
now generally affects to be superior
to the social position she occupies;
she endeavors to dress, live, and act
up to the higher standard she has
adopted as her own. This attitude,
and its attendant circumstances, event-
ually induce the ordinary middle class
husband to regard her as socially su-
perior to himself. In time, from this
cause, he becomes little better than a
footman to his own wife.—London
Truth.

New Cure for Baldness.
For his curious theory that baldness
is due to lack of upper chest breath-
ing, Dr. Delos M. Parker, of the De-
troit College of Medicine, claims verifi-
cation by thousands of observations
during many years. No victim of
common baldness was found who
breathed properly. The lungs being
imperfectly filled and emptied, it is
supposed that residual air is left in
the upper passages, and develops a
soluble poison. This poison specially
affects the scalp, where the skin is
practically bloodless, and, therefore,
of low vitality. Persistent return to
correct breathing has been followed
by disappearance of dandruff in one
week and beginning of a new growth
of hair in six weeks and a fresh cover-
ing has been developed on a head that
had been bald 20 years.

Queer Athens Beggar.
Modern Athens has recently lost
a twentieth century Diogenes. He
was a beggar named Sacoules and
displayed a good deal of the spirit
of the ancient cynic.
He could not exactly place his tub
on the streets, but he found out a
sort of grotto in the side of the
acropolis, the identical one which the
ancients fabled to be haunted by
the Furies, and here he lived for
years. He was a beggar who had
his price, and he fixed it at one penny,
less than which sum he declined to
ask. If it was refused he only shrug-
ged his shoulders with contempt.
He would penetrate the cafes and
if the company ignored his presence
he would exclaim: "What! 150,000
to work, and a wretch like me can't
be assisted." Then would follow a
sound rating. He had become an in-
stitution, and his death is commented
on with regret.
